INSTRUCTIONS:

1. Set your donuts, fangs, M&M's and peanut butter on your working area, so you have everything ready.
2. Take one of the fangs and squish them up and pinch them together to get them into the donut hole. Just push it into the hole and let it open up on its own. Then adjust it as you need to. The fangs we got are pretty flexible, try to get that kind, rather than more solid ones. Repeat with all your donuts.
3. Next, place the eyes. With the tip of a chopstick, or the tip of a small spoon, dab a bit of peanut butter on one side of an M&M and place on the donut, where the eyes should be. That's it!
